

CAM-2017

Conference on Accessory Minerals

September 13 – 17, 2017

Vienna, Austria

Institut für Mineralogie und Kristallographie, Universität Wien

in collaboration with

Earth Science Institute, Slovak Academy of Sciences, Bratislava

Department of Geological Sciences, Masaryk University, Brno

and

Naturhistorisches Museum Wien

Book of abstracts

ORGANISERS:

Lutz Nasdala

Vienna, Austria

lutz.nasdala@univie.ac.at

Igor Broska

Bratislava, Slovakia

igor.broska@savba.sk

Milan Novák

Brno, Czech Republic

mnovak@sci.muni.cz

Cover image:

Cross-polarised transmitted-light photomicrograph of a zoned zircon crystal from a potassic granulite mined in the Plešovice quarry (ca. 15 km southwest of České Budějovice, Czech Republic). Low interference colours indicate elevated radiation damage that is associated with notable volume expansion; such growth zones are therefore surrounded by fractures in neighbouring, less radiation-damaged zones. Sample courtesy J. Sláma, sample preparation A. Wagner.
